The International Conference on Security of Information and Networks (SIN-Conf) has been held over the past 15 years in numerous countries across the Middle East and Asia. The 15th edition of the conference will be held in Tunisia.

SIN-Conf 2022 will include oral, poster sessions and tutorials given by experts in state-of-the-art topics. The regular technical program will run for three days. In addition, tutorial sessions will be held on the first day of the conference. Papers are solicited in, but not limited to, the following topics

Secure information systems

- Security, privacy, and trust of blockchain and distributed ledger technologies
- Consensus mechanisms, especially distributed control and processing applications
- Secure smart contracts

Security in networks

- Network security and protocols
- Computer network defence
- Next generation network architecture
- Autonomous and adaptive security

Development and realization of fundamental technologies

- Cryptographic techniques and key management
- Post Quantum Cryptography
- Security schemes
- New algorithms
- IoT Security and Trust
- Malware analysis
- Access control and intrusion detection
- Computational intelligence techniques in security
- Trust and privacy

Application Areas

- detection and prevention of cybercrimes such as fraud and phishing
- Industrial applications of security
- Industrial experiences and challenges of security systems
- Security of cyber-physical systems
- Security tools and development platforms
- Security-aware software engineering
